

CREPE PAPER
& FROSTED PAPER

HELLEBORE FLOWERS

LIA GRIFFITH

INCLUDED IN THIS KIT:

Double-Sided *Sangria & Aubergine* Crepe
Double-Sided *Green Tea & Cypress* Crepe
Extra-Fine *Juniper* Crepe Paper
Frosted Gold Paper
12 Each Green Wires - 24 & 18-Gauge
12 Spun Paper Balls - 12 mm

CUTTING MACHINE:

Fine Point Blade for Gold Paper
Rotary Blade for Crepe Paper (optional)

TOOLS YOU WILL NEED:

- ☐ Detail Scissors
- ☐ Craft Scissors
- ☐ Curling Tool
- ☐ Bearly Art Craft Glue
- ☐ Wire Cutters
- ☐ Needle Nose Tweezers
- ☐ Blending Brush
- ☐ PanPastel *Bright Yellow Green*
- ☐ Posca Paint Marker – Red Wine

(FOR PERSONAL USE ONLY)

- ① Cut the four center pieces from the gold frosted paper using the fine point blade. Use the Light Cardstock setting on less pressure. Color the area of each center as shown on template.

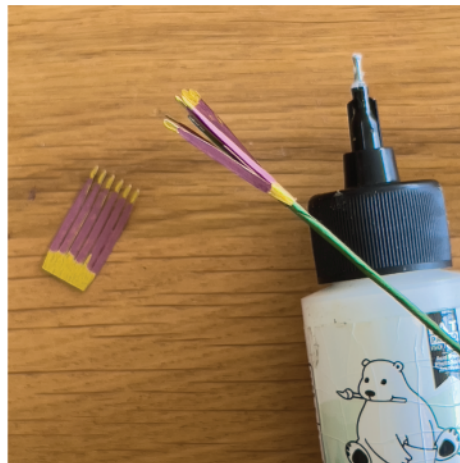

- ② Remove all of the outer fold paper then use the needle nose tweezers on the center of each piece to gently pull them off the mat.

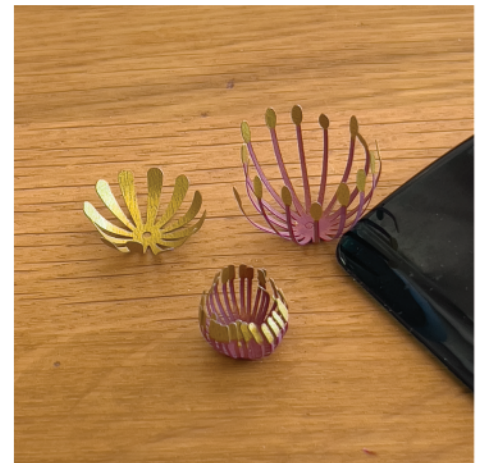

- ③ Color the backs to match the fronts on the three center shapes.

- ④ Cut 4.5 inches from the 18-gauge wire. Glue the spun ball onto the wire and set aside to dry.

- ⑤ With the leftover wire (7.5 inches) wrap the center fringe around the tip gluing into place. Set aside to dry.

- ⑥ Use the curling tool to gently shape the other three gold centers. Finish the smallest colored piece by rolling into a loose ball.

- ⑦ Slide the smaller colored piece onto the wire and glue into place. Follow with the second, then the final gold shape.

- ⑧ Gently stretch the four bud petals to form a cup. Glue one onto the top of the ball to completely cover.

- ⑨ Glue only at the base with second petal, attaching so petal forms a point. Repeat with other two petals.

- 10 Cut a small strip of the crepe paper along the grain and fully stretch. Using glue, wrap the stem of the bud.

- 11 Gently stretch the 5 petals to form a very slight cup.

- 12 Gluing only at the base, overlap and attach each of the 5 petals to form a full bloom. Gently shape the petal tips with the curling tool.

- 13 Slide the wire into the center of the petals and glue into place under the layered centers. Set aside to dry.

- 14 Cut 24-gauge wire into 4 inch pieces. Add a line of glue along leaf edge. Place wire on glue then add glue to top of wire. Place other half of leaf onto wire and seal with pressure.

- 15 Using the light green PanPastel, blend color onto the tips of the burgundy leaves. Blend color at the base of the green leaves. Turn leaves over and repeat.

- 16 Wrap the flower 1.5 inches down the stem with stretched crepe and glue.

- 17 Place the arched bud along the stem and wrap and glue to secure.

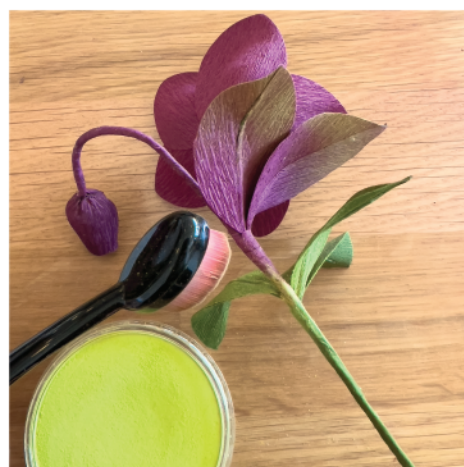

- 18 Add the two burgundy leaves, covering the wires and wrapping with crepe at base of the leaves.

- 19 Cut a half-inch strip of extra-fine green crepe along the grain. Add the three leaves to the stem and wrap with the green crepe and glue to secure.

- 20 Bend the stem to arch the flower head and bend and arch each of the 5 leaves.

- 21 Color the stem where the wrap changes from burgundy to green to blend the color.

- 22 Blend some color at the base of the bud and stem.

- 23 Arrange the larger leaves with the flat edge in the center and the points down. Glue wire between two layers and seal by pinching between fingers.

- 24 Stack three leaves then wrap the stems with the green crepe strip and glue.

- 25 Stack three leaves then wrap the stems with the green crepe strip and glue.

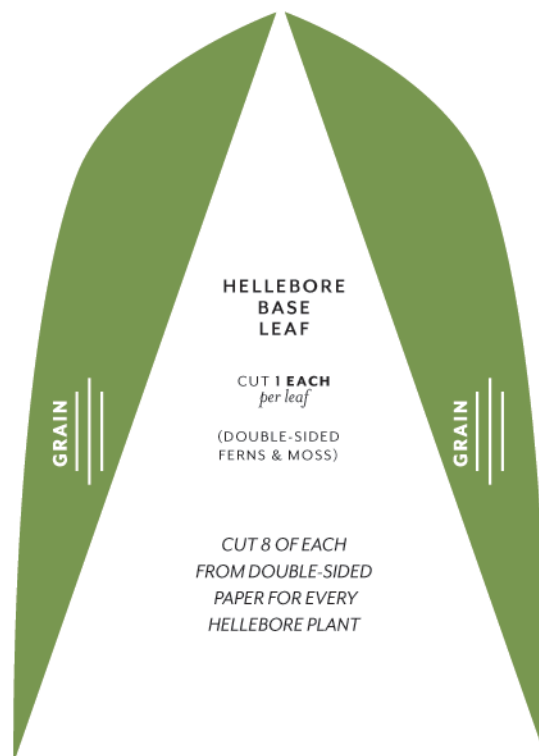

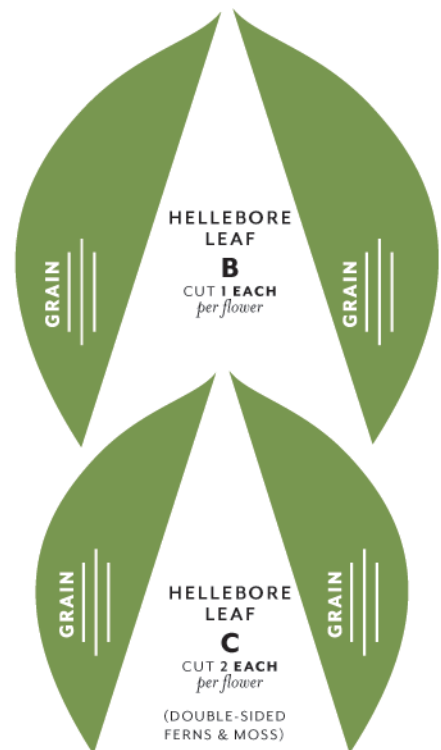

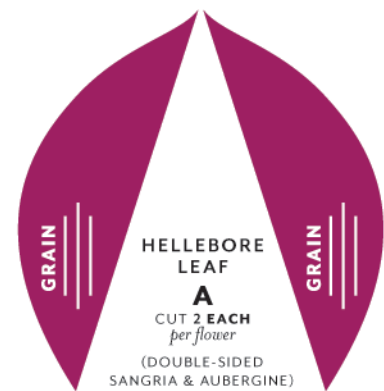

- 26 Bend and shape the leaves.

- 27 The finished flower can be used in an arrangement, or add the large leaves for a potted Hellebore plant.

HELLEBORE FLOWERS & BUDS

CUTTING MACHINE FOR CREPE

1. Download the file to computer. (Find in **DOWN-LOAD** folder on your computer)
2. Double-click to unzip the file
3. From machine software, upload the unzipped file and place onto canvas
4. Read over the designer notes then hide layer
5. Press the make it button to view each mat
6. If file is unlocked, arrange pieces to maximize mat (do not rotate any templates)
7. Note: The folder includes locked SVG to maximize the paper, plus unlocked SVG for cutting flexibility
8. Click to proceed to cut settings

CUTTING MACHINE TIPS:

- For cutting crepe paper, use a **rotary blade**.
- Cut your crepe paper **12 inches wide**.
- Choose a **mat with the right stick** for best results.
- Place paper on mat with **grain vertical**.
- Use a **brayer** to press the crepe to the mat.
- Once cut, remove the crepe paper pieces using **needle-nose tweezers**.

CRICUT ROTARY CUT SETTINGS

GOLD FROSTED PAPER	
SETTING	PRESSURE
LIGHT CARDSTOCK	LESS

DOUBLE-SIDED CREPE PAPER	
SETTING	PRESSURE
COTTON	DEFAULT

NOTE: These settings may vary for each machine, blade use, and software updates. We recommend you test cut a small area before cutting a full mat of crepe paper.
